PREFACE

This parts manual has been prepared to assist you in locating individual parts or assemblies on 39500 Series machines.

It is the desire of Union Special that each machine run at its optimum performance. Parts listed in this manual are designed specifically for your machine and are manufactured with utmost precision to assure long lasting service.

This manual has been comprised on the basis of available information. Changes in design and/or improvements may incorporate a slight modification of configuration in illustrations or part numbers.

On the following pages are illustrations and terminology used in describing the parts used on 39500 Series machines.

SAFETY RULES

1. Before putting the machines described in this manual into service, carefully read the instructions. The starting of each machine is only permitted after taking notice of the instructions and by qualified operators.

IMPORTANT! Before putting the machine into service, also read the safety rules and instructions from the motor supplier.

2. Observe the national safety rules valid for your country.
3. The sewing machines described in this instruction manual are prohibited from being put into service until it has been ascertained that the sewing units which these sewing machines will be built into, have conformed with the EC Council Directives (89/392/EEC, Annex II B).

Each machine is only allowed to be used as foreseen. The foreseen use of the particular machine is described in paragraph "STYLES OF MACHINES" of this instruction manual. Another use, going beyond the description, is not as foreseen.

4. All safety devices must be in position when the machine is ready for work or in operation. Operation of the machine without the appertaining safety devices is prohibited.
5. Wear safety glasses.
6. In case of machine conversions and changes all valid safety rules must be considered. Conversions and changes are made at your own risk.
7. The warning hints in the instructions are marked with one of these two symbols:

8. When doing the following the machine has to be disconnected from the power supply by turning off the main switch or by pulling out the main plug:
 - 8.1 When threading needle(s), looper, spreader etc.
 - 8.2 When replacing any parts such as needle(s), presser foot, throat plate, looper, spreader, feed dog, needle guard, folder, fabric guide etc.
 - 8.3 When leaving the workplace and when the workplace is unattended.
 - 8.4 When doing maintenance work.
 - 8.5 When using clutch motors without actuation lock, wait until the motor is stopped totally.
9. Maintenance, repair and conversion work (see item 8) must be done only by trained technicians or special skilled personnel under consideration of the instructions.
10. Any work on the electrical equipment must be done by an electrician or under direction and supervision of special-skilled personnel.
11. Work on parts and equipment under electrical power is not permitted. Permissible exceptions are described in the applicable sections of standard sheet DIN VDE 0105.
12. Before doing maintenance and repair work on the pneumatic equipment, the machine has to be disconnected from the compressed air supply. In case of existing residual air pressure, after disconnecting from compressed air supply (i.e. pneumatic equipment with air tank), the pressure has to be removed by bleeding.

IDENTIFICATION OF MACHINES

Each UNION SPECIAL machine is identified by a style number, which is stamped into the style plate affixed to the middle of the machine under the tension assembly. The serial number is stamped into the serial number plate affixed to the right rear base of the machine.

CLASS DESCRIPTION

Mark IV Hi-Styled high speed, light to medium duty machine. One or two needles, three and four thread overseaming machines, differential feed, trimming mechanism with spring pressed lower knife, automatic lubricating system. Improved air cooling system.

STYLE OF MACHINES

39500HUGC High speed, two needle, two loopers, four thread mechanism with spring pressed lower knife, automatic lubricating system. Improved air cooling system. - Typical Application - for closing the toe sections of women's seamless nylon hosiery on light to medium duty machine. Seam Specification 521-SSa-1 (Mod.). Standard gauge 032, (1/8", 3.2mm). Stitch Range, 20-100 per inch; cam adjusted main and differential feeds. Recommended speed 8000R.P.M.. Recommended needle 154GFS, size 075/029.

39500RBAC High speed, one needle, one looper, one spreader three thread overseam machine with spring pressed lower knife, automatic lubricating system. Improved air cooling system. - Typical Application - for crotch seaming nylon hosiery on light to medium duty machine. Seam Specification 521-SSa-1 (Mod.). Standard gauges 032, (1/8", 3.2mm), 040, (5/32", 4.0mm). Stitch Range, 20-100 per inch; cam adjusted main and differential feeds. Recommended speed 8000R.P.M.. Recommended needle 154GFS, size 065/025.

ILLUSTRATIONS

This manual has been arranged to simplify ordering repair parts. Exploded views of various sections of the mechanism are shown so that the parts may be seen in their actual position in the machine. On the page opposite the illustration will be found a listing of the parts with their part numbers, description and the number of pieces required in the particular view being shown.

Numbers in the first column are reference numbers only, and merely indicate the position of the part in the illustration. The reference number should never be used in ordering parts. Always use the part number listed in the second column.

Component parts of sub-assemblies which can be furnished for repairs are indicated by indenting their descriptions under the description of the main sub-assembly. As an example refer to the following text.

5.	29477MX	Upper Looper Thread Tube Assembly	1
6.	39568G	Thread Tube	1
7.	39568J	Thread Tube Tension Spring	1
8.	22743	Set Screw, for thread tube tension spring	1

When a part is common to all machines covered in this manual, no specific usage will be mentioned in the description. However, when the parts for the various machines are not the same, the specific usage will be mentioned in the description and, if necessary, the difference will be shown in the illustration.

*NOTE: Ref. No. showing no Part No. is for location only. Part is not for sale separately.

A numerical index of all the parts shown in this manual is located at the back. This will facilitate locating the illustration and description when only a part number is known.

IDENTIFYING PARTS

Where the construction permits, each part is stamped with its part number. On some of the smaller parts and on those where construction does not permit, an identification letter is stamped in, to distinguish the part from similar ones.

PLEASE NOTE: Part numbers represent the same part, regardless of which manual they appear. On all orders please include part number, name and style of machine for which the part was ordered.

For optimum performance use only genuine Union Special replacement parts.

NEEDLES

Each needle has both a type and size number. The type number denotes the kind of shank, point, length, groove, finish and other details. The size number, stamped on the needle shank, denotes the largest diameter of the blade measured between the shank and the eye. Collectively, the type number and size number represent the complete symbol which is given on the label of all needles packed and sold by Union Special.

TYPE

DESCRIPTION

154 GFS	Slabbed shank, round point, .046 inch double slab, standard length, curved blade, single groove, ball point, spotted, chromium plated - sizes 065/025, 070/027, 075/029, 080/032, 040.
----------------	--

When changing the needle, make sure it is fully inserted in the holder before the screw is tightened.

When ordering needles, please use the complete type and size numbers as printed on the package to ensure prompt and accurate processing of your order. A complete order should read as follows: "100 needles, type 154 GFS, size 075/029".

UPPER AND LOWER LOOPER DRIVING PARTS

Ref. No.	Part No.	Description	Amt. Req.
1.	39508A	Upper Looper, marked "CC"	1
2.	39543	Upper Looper Holder	1
3.	22564G	Screw, for upper looper holder	1
4.	39543A	Upper Looper Holder Collar	1
5.	77	Screw, for upper looper holder collar	1
6.	22565F	Spot Screw, for bushing and cam guide	1
7.	1025L	Lock Screw, for bushing and cam guide screw	1
*8.	39543T	Cam Follower	1
*9.	39543S	Bushing and Cam Guide	1
*10.	39543K	Upper Looper Drive Shaft	1
11.	22503F	Screw, for cam follower locking clamp	1
12.	39543E	Cam Follower Locking Clamp	1
13.	97	Screw, for ball joint guide fork	2
14.	39544J	Ball Joint Guide Fork, for upper looper drive lever	1
15.	482C	Upper Looper Shaft Collar	1
16.	22894C	Set Screw, for upper looper shaft collar	2
17.	22565	Set Screw, for upper looper rocker shaft	1
18.	39543X	Upper Looper Drive Lever Shaft	1
19.	22565S	Spot Screw, for upper looper drive lever shaft	1
20.	39543W	Upper Looper Drive Lever	1
21.	39543AT	Clamp Collar, for upper looper drive shaft	1
22.	22875M	Screw, for clamp collar	1
23.	39543P	Upper Looper Drive Shaft Thrust Washer	2
24.	39543AV	Upper Looper Drive Lever Connecting Rod	1
25.	39543AF	Nut, barrel	4
26.	87U	Screw, for oil splasher	1
27.	39594N	Oil Splasher	1
28.	77	Screw, for lower looper bar connecting link pin	1
29.	39544B	Lower Looper Bar Connecting Link	1
30.	39544D	Lower Looper Bar Connecting Link Pin	2
31.	77	Screw, for lower looper bar connecting link pin	1
32.	22894AE	Set Screw, for lower looper driving shaft	2
33.	482C	Lower Looper Drive Shaft Collar	1
34.	22894C	Set Screw, for lower looper drive shaft collar	2
35.	660-206	"O" Ring, for lower looper driving shaft	1
36.	39544V	Lower Looper Drive Shaft	1
-	39508P	Lower Looper, for Style 39500HUGC	1
37.	39560B	Lower Spreader, for Style 39500RBAC	1
38.	39151	Nut, for lower looper bar	1
39.	39544	Lower Looper Bar	1
40.	39594N	Oil Splasher	1
41.	87U	Screw, for oil splasher	1
42.	29126DF	Lower Looper Bar Drive Lever and Connecting Rod Assembly	1
43.	39544AA	Lower Looper Drive Lever Connecting Rod	1
44.	22729E	Screw, for connecting rod	2
45.	22729D	Screw, for connecting rod	2
46.	39544S	Ball Joint Guide Fork	1
47.	97	Screw, for ball joint guide fork	2
48.	39544U	Lower Looper Bar Drive Lever	1

* The use of assembly No. 29126EC is recommended instead of the individual parts.

UPPER AND LOWER KNIFE

Ref. No.	Part No.	Description	Amt. Req.
1.	39573AE	Upper Knife Drive Connection Rod	1
2.	22587J	Screw, for upper knife drive connection rod	2
3.	39573E	Upper Knife Drive lever	1
4.	55235E	Nut, for upper knife drive lever	1
5.	6042A	Washer, for upper knife drive lever	1
6.	55235D	Locking Stud, for upper knife drive lever	1
7.	39573H	Upper Knife Drive Arm	1
8.	39571D	Upper Knife Clamp Stud	1
9.	22738	Screw, for upper knife clamp stud	1
10.	39573A	Upper Knife Drive Arm Washer	1
11.	39572	Upper Knife Holder Block	1
12.	39570	Upper Knife	1
13.	39571F	Upper Knife Clamp	1
14.	39571B	Upper Knife Chain Guard	1
15.	14077	Nut, for upper knife clamp stud	1
16.	39525	Needle Guard, front, for Style 39500HUGC	1
-	39525H	Needle Guard, front, for Style 39500RBAC	1
17.	39525E	Needle Guard, rear, for Style 39500HUGC	1
-	39525J	Needle Guard, rear, for Style 39500RBAC	1
18.	22585A	Screw, for needle guards	2
19.	39580AJ	Throat Plate and Lower Knife Support Bracket, for Style 39500HUGC ..	1
-	39580A	Throat Plate Support, for Style 39500RBAC	1
20.	22653B12	Screw, for throat plate and lower knife support bracket	2
21.	39580F	Washer, for throat plate and lower knife support bracket	2
22.	14077	Nut, for lower knife holder locking screw	1
23.	22892B	Locking Screw, for lower knife holder	1
24.	39550C	Lower Knife Holder Locating Stud	1
25.	22729B	Screw, for lower knife holder locking stud	1
26.	39550AK	Lower Knife Holder, for Style 39500HUGC	1
-	39550AF	Lower Knife Holder, for Style 39500RBAC	1
27.	39549	Lower Knife	1
28.	39550AC	Knife Guide Plate	1
29.	39550AE	Lower Knife Clamp Spring	1
30.	605A	Screw, for lower knife clamp spring	1
31.	22588J	Screw, for lower knife clamp	1
32.	39550AD	Lower Knife Clamp	1
33.	39550X	Lower Knife Holder Spring	1
34.	C39524BA	Throat Plate, marked "LD", for single needle machines, for Style 39500HUGC ..	1
35.	22524	Screw, for throat plate	1
36.	39524BV	Throat Plate, for Style 39500RBAC	1

CSMP

OIL METERING PIN

Beginning with machine serial number 1620485 the wood oil metering plug is now being replaced by a steel metering pin which is inserted inside the main shaft on all 39500 Class Machines.

The pin is easy to remove. On the "Mark IV" machines the head is protruding beyond the end of the shaft and it can be pulled out with tweezers. With a wood plug the rate of oil flow was determined by the grain of the wood itself and could not be varied or adjusted. The steel pin, on the other hand, can be easily replaced with a slightly larger or smaller diameter pin to reduce or increase the flow to a precise degree.

NOTE: One final point - metering pins can not be added to machines with serial numbers below 1620485, because the crankshafts are not prepared for them. A new crankshaft assembly would have to be installed with the pre-selected metering pin in it.

39593U METERING PIN SIZE CHART		
PART NUMBER	PIN DIAMETER	
	INCH	MM
39593 U-125	0.1250	3.175
39593 U-126	0.1260	3.200
39593 U-1265	0.1265	3.213
39593 U-127	0.1270	3.225
39593 U-1275	0.1275	3.238
39593 U-128	0.1280	3.251
39593 U-1285	0.1285	3.263
39593 U-129	0.1290	3.276

WORLDWIDE SALES AND SERVICE

Union Special Corporation maintains sales and service facilities throughout the world. These offices will aid you in the selection of the right sewing equipment for your particular operation. Union Special Corporation representatives and service technicians are factory trained and are able to serve your needs promptly and efficiently. Whatever your location, there is a qualified representative to serve you.

Brussels, Belgium
Charlotte, N.C.
El Paso, TX
Hong Kong, China
Huntley, IL
Leicester, England
Lille, France
Miami, FL
Milan, Italy
Möglingen, Germany
Montreal, Quebec
Osaka, Japan
