A4F

Item: computerized lock-stitch sewing machine with light sound
 Feature: Light sound, precise stitch, better to use

1 one key to reset

2 half stitch

3 reverse sewing function

4 needle gauge adjustment button

5 presser foot height adjustment button

6 strong wind power hand-wheel

7 product introduction QR code

8 USB port

Germany design, unique image, precise details.

1 Accurate stitch length

The stitch length is controlled by a stepping motor, accurate to 0.1mm, and the stitch length adjustment function can be locked as needed to avoid random adjustment of the stitch length.

2 Lock thread front and back, high stitch repetition rate

A perfect reverse stitch can be realized at any stitch length, and the front and rear thread lock function can be set.

3 Pattern sewing, stylish and beautiful

You can choose different patterns and stitches according to the requirements of clothing craftsmanship, and you can edit the patterns you need to give you stylish and beautiful stitches.

4 Step control, lighter sound

Scientific design, through the stepping motor to control the reverse stitching and presser foot lifting, realize the reverse stitching and presser foot lifting silently, giving you a quiet and comfortable working environment

5 Short thread ends, no need to trim again

There is no need to trim the thread ends after sewing, one less thread trimming action, one less risk of cutting the fabric, saving time, labor and money.

6 Height adjustable, easy to operate

After trimming and midway, the height of the presser foot can be adjusted within the range of 0-13mm, which can meet the requirements of different fabrics, saving labor and convenience.
