Super-high-speed, Overlock / Safety Stitch Machine

MO-6900S Series

MO-6914S

MO-6900S Series

High-quality machine with easier operation and increased reliability.

The MO-6900S Series is a new and powerful overlock/safety stitch machine that has been developed to offer increased reliability and ease-of-use, while upgrading seam quality at higher sewing speeds. It responds to a wider range of materials and processes to finish high-quality soft-feeling seams. With the operating noise having been reduced and increased durability ensured, the cost-effective MO-6900S Series is a leading machine in the new era.

MO-6904S

MO-6916S

● ***The machine ensures both beautiful and upgraded seam quality at higher speeds.***

Since the machine comes with a needle-thread take-up mechanism as well as a looper thread take-up mechanism, to offer upgraded responsiveness from light- to heavy-weight materials with a lower applied tension, it achieves well-tensed soft-feeling seams that flexibly correspond to the elasticity of the material at the maximum sewing speed of 8,000 to 8,500rpm. To offer improved sewing capabilities as well as to prevent stitching missshapes, the machine is equipped as standard with the needle thread heat remover and needle cooler.

● **Runstitching in general fabric
MO-6914S-BE6-307**

● ***The machine has been developed with the intention of providing an extended service life.***

The machine incorporates various mechanisms as standard, such as a differential-feed micro-adjustment mechanism and an external adjustment mechanism for adjusting the feed dog inclination as well as increasing the differential feed ratio, which can be easily adjusted to finish seams that perfectly match the material to be used. Comfortable operation is all but guaranteed, by a wider area around the needle entry, the adoption as standard of a micro-lifter feature that offers improved responsiveness to materials and provides the operator with upgraded operability, and by the reduction of operating noise and vibration, which has been achieved by designing an optimally balanced machine.

● ***Further increased reliability.***

The introduction of a shield-structured needle bar mechanism and upper and lower needle bar bushings, contributes to increased durability and reliability. Additionally, the machine incorporates an improved feed mechanism and upper looper unit as well as coming standard with a cartridge type oil filter and cooling fan, thereby ensuring enhanced reliability.

● ***Devices intended for conventional JUKI machines are also interchangeable.***

Gauges and devices you have used with your existing JUKI machines are also interchangeable with no additional machining required (excluding the LB Series). This eliminates both the waste of resources and unwanted extra costs.

● Gathering device

S159	MAS-159000A0	Swing-type gathering device (interlocked with pedal / for safety stitch machine)	The attachment opens with the presser foot pedal. This facilitates material setting on the machine. Furthermore, a knee-control type differential-feed adjusting device is built in the attachment. It controls a differential-feed ratio as desired, thereby enabling the operator to make beautiful gathers.
S160	MAS-160000A0	Swing-type gathering device (interlocked with pedal / for overlock machine)	
S161	MAS-161000A0	Swing-type gathering device (manual-lever operated / for safety stitch machine)	The attachment is used to perform two different processes, joining fabric process and gathering process, at a time.
S162	MAS-162000A0	Swing-type gathering device (manual-lever operated / for overlock machine)	The attachment can be opened/closed by using the lever (manually operated). The differential-feed ratio is controlled with the knee lever.

● Blind hemming device

L121	MAL-121000A0	Blind stitch hemming attachment		A ruler used for blind hemming in knits
L122	MAL-122001A0	Automatic folded-edge controlled blind hemming device	For flat upper knife	For 110, 115, 220, 240V
	MAL-122002A0		For 220, 380, 415, 440V	
	MAL-122001AA	For square upper knife	For 110, 115, 220, 240V	
	MAL-122002AA		For 220, 380, 415, 440V	
L123	MAL-123000A0	Spring-type folded-edge controlled bottom hemming device		When the overlapped section of a material is reached, the blind hemming guide will move sufficiently to prevent stitch deviation.

● Piping folder

M056	MAM-0560J0A0	Piping folder	This piping folder makes a piping first, then turns up the tape.
M075	MAM-0750J0A0	Piping folder (to be used with knit tape)	This attachment can be used for both "cotton bias tape with gimp" and "knit tape". The operation mode can be changed over with a fingertip control.
M076	MAM-0760N0A0	Ready-made piping folder	The dimension of ready-made tapes can be adjusted within the range of 8 to 13mm.
M077	MAM-0770M0A0	Piping folder for gathering	The attachment makes gathers on the lower fabric while making decorative piping.

● Guide, Ruler

H153	MAH-153000A0	Cloth edge guide ruler (for overlock machine)	A swing type edge guide.
H154	MAH-154000A0	Cloth edge guide ruler (for safety stitch machine)	
Q141	MAQ-141000B0	Tape guide	This attachment is used attached on the machine head (face plate). It is used for tapes with the width of 7mm or less.
S084D	MAS-084000AD	Pattern guide	This attachment is used for overedging a sleeve bottom placket with a sharp curve. It enables the machine to smoothly sew the curved section of a sleeve bottom placket along with the guide pin of the presser foot.

● Feller, Binder

K006	MAK-00601000	Upturn feller	This feller is exclusively used with the 300 throat plate. It is attached on the throat plate.
N067	MAN-0670D0A0	Reinforcement tape attachment binder	This binder binds the edge of a pocket bag while cutting round its periphery.
N077	MAN-077000A0	Clean finish top and bottom	This binder runstitches a pocket bag and binding its periphery with tape simultaneously.

● Miscellaneous

Z173	MAZ-173000A0	Backlatch device (for 1-needle overlock machine)	It sews chain-off thread at the start of sewing inside overedged seam. With this device, the operator is no longer required to neatly arrange the chain-off thread. Rolled-in chain-off thread also works as a simplified bartack.
